
Meridian 1

Remote Peripheral Equipment

Description, installation, and testing

Document Number: 553-2601-200

Document Release: Standard 3.0

Date: December 1994

Printed in the United States of America

Information is subject to change without notice. Northern Telecom reserves the right to make changes in design or components as progress in engineering and manufacturing may warrant. This equipment has been tested and found to comply with the limits for a Class A digital device pursuant to Part 15 of the FCC rules.

SL-1 and Meridian 1 are trademarks of Northern Telecom.

Revision history

August 10, 1990

Standard, release 1.0. Reissued for compliance with Northern Telecom standard 164.0.

December 1, 1991

Standard, release 2.0. Reissued to include technical content updates. Due to the extent of changes, revision bars are omitted.

December 1994

Standard, release 3.0. Reissued for editorial changes. Due to the extent of the changes, revision bars are omitted.

Contents

Description	1
Equipment configuration	3
Carrier system	3
Carrier shelf	3
Circuit cards	5
Emergency transfer	5
Equipment description	9
Cabinets	9
Carrier shelves	9
PE shelves	11
QPC62 1.5 Mbaud Converter Card	11
QPC63 Local Carrier Buffer Card	12
QPC65 Remote Peripheral Switch Card	13
QPC66 2 Mbaud Converter Card	13
QPC67 Carrier Maintenance Card	14
QPC85, QPC190, and QPC355 5/12 V Converter Cards	14
QPC99 Carrier Interface Card	15
Cables	16
QBL14 Power Distribution Box	16

Assembly and installation	17
Carrier interface	29
Land-based carrier	29
General engineering considerations	29
Carrier specifications	30
In-house RPE	33
Microwave radio	35
Connections	37
Testing	45
Network loops	45
Telephone, consoles, and add-on modules	45
Emergency transfer stations and trunks	46
Transmission quality test	46
Span line fault locating	48
